## Introduction

This guide has been developed to help integrate the Userplane applications (chat room and instant messenger) into eMeeting dating software build 9.0+.

### 1. Requirements

Please ensure you have signed up for the free or paid “integrated” version of the Userplane applications, you can signup using the link below;

<http://www.userplane.com/index.cfm?fuseaction=buy.packages>

### 2. Userplane signup pages

When using the signup pages at the Userplane, please ensure that you select the integrated option and select “eMeeting” from the drop down menu.

### 3. After Signup

After you have signed up for the integrated Userplane apps, you will have to wait a period of time for Userplane to setup your account. This often takes between 2 – 5 working days.

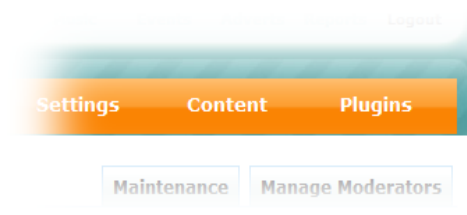

Once setup, they will email you and eMeeting ltd an email which will contain the following information;

- domainID
- FlashCom server
- Presence ID
- Password
- WC number
- MC number
- WM number

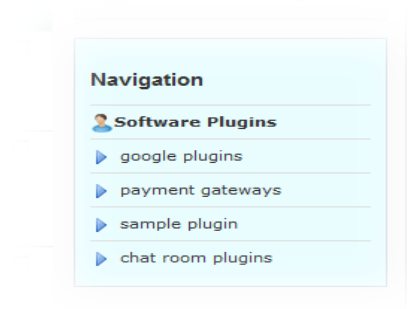

- UL number
- TXT number

## 4. Installing the Userplane applications

Once you have received your email from Userplane with the information above, you need to login to your admin area and click on Plugins menu;

Once you have the plugins page loaded, you will need to select the “chat room plugins” tab from the right menu.

Now, we need to activate the plugin before we can start using it to select the checkbox next to the Userplane plugin and then click update at the bottom.

| <b>Userplane Chat Room and Instant Messenger - Version 7.0</b><br>Add free or paid Userplane web cam and audio chat to your website. Use the link below to create an account.<br>Author Url: <a href="http://www.userplane.com/buy/">http://www.userplane.com/buy/</a> - Updated: April 5th 2008 | <b>Activate</b>   <b>Edit</b>   <input checked="" type="checkbox"/> |

Once you have updated the plugin, you must then edit it so that you can enter the Userplane details provided in the email sent from Userplane.

You can view and download new software plugins from the customer area of our web site.

### chat room plugins

**Enable Userplane Chat**

Turn on or off userplane chat room. This will replace your existing chat room.

---

**Userplane IM**

This will turn on or off Userplane Instant Messenger. This will replace your existing instant messenger.

---

**Userplane Adverts**

If you are using the free userplane integrated code, you MUST enable this. Fail to enable this will result in userplane closing down your account and sending you an invoice via post.

---

**FlashCom server:**

Enter your FlashCom server name here. This is sent via email to you from userplane. It looks something like this: flashcom.XXXXXX.userplane.com

---

**domainID:**

Enter your Domain ID here. This is sent via email to you from userplane. This is usually the name of your website.

---

**FlashCom Image Server**

Enter your FlashCom Image server name here. This is sent via email to you from userplane. It looks something like this: images.XXXXXX.userplane.com

---

**Presence WM**

Enter your Userplane Ad Code for WM here. This is sent to you by userplane, please contact them if you dont know what this is. (Failure to properly display ad code will result in disconnection)

Now enter the Userplane details provided in the welcome email into the field boxes as labeled, ensure you select enable on the applications you wish to use.

## **Installation Completed**

Congratulations, you are now ready to start using the Userplane applications. Now when you click on your chat room or use the build in IM, the default software apps will be replaced with the Userplane ones.
